

I am writing to protest translators being replaced with LPFM. I listen to K-Love via a translator (FM 90.7) and enjoyed being connected with others across the country. The station is careful to include local events as well as national ones. I have seen this station unite our community in a way that local stations have not been able to because of the quality programming that they provide. If this station were to be replaced by a LPFM our community would lose a high quality station that a local station could not duplicate and the community would be at a loss as to how to replace that valuable commodity. Please continue to allow K-Love to use translators to broadcast across the country.
